## World Handicap System - Maximum Score on a Hole

**Posting** your score into the GHIN application must follow the World Handicap System. You should NOT post total scores that include per hole scores that are higher than the "Maximum Score on the Hole," which is known as Double Bogey plus Strokes, or Net Double Bogey.

## Net Double Bogey = Par of the Hole + 2 strokes + 'Pops' for the hole

'Pops' are the handicap strokes the player is entitled to receive on that hole based on their Course Handicap. See below for a chart showing your next maximum score on each hole for the Ken McDonald Course.

**SCORECARD:** *Actual* scores for each hole should be written on your scorecard for all Tournaments and Play of the Day games. These scores are what are used to determine the winners of the events. If you choose to not finish out a hole, then you can put your maximum score on the card with an **X** next to the score. This will let the tournament committee know that the hole will not be used for tournament play. Be aware that if you **X** out on a hole that is part of the day's "game", it will disqualify you from the game.

As an example of how to read. On Hole 1 which is a Par 4, if your handicap is between 11 and 28 then the maximum score on that hole for you would be 7. If your handicap is between 29 and 46 then the maximum score on that hole for you would be 8. This is your Posting score.
